

About Me

I have experience in React.js, JavaScript, and Python, and have worked with backend development, including APIs and MySQL databases. I enjoy both frontend and backend programming and am comfortable collaborating with international teams due to my strong English skills.

- Content creation skills (social media platforms)

Languages

- Finnish (native)
- English (excellent)
- Japanese (beginner)

Petri Korpikoski

ICT Engineering Student at Lapland University of Applied Sciences (Lapin AMK)

My journey as a programmer

(2022 -2024)

LEARNING THE FUNDAMENTALS

- Started by learning the fundamentals of Python and programming through a beginner's course offered by freeCodeCamp.
- Started working on the basics of the web stack: HTML and CSS.
- Earned the certificate of completion for Responsive Web Design.
- Moved on to Javascript now that I had my web development basics down.
- Earned the certificate of completion for Javascript Algorithms and Data Structures.

(2024 - Current)

FROM SELF-TAUGHT TO ENGINEERING STUDENT

- Moved on to learning React now that my fundamentals were good enough.
- Started reading up on databases, such as MySQL.
- Currently delving deeper into Python programming and computer hardware.
- Actively studying in **Lapland University of Applied Sciences (Lapin AMK)**.
