

About Me

Most of my experience is in React.Js, Javascript and Python. I have also gotten into backend development with API's and databases, such as MySQL. I enjoy all forms of programming. Whether it's frontend or backend focused or both. My english is very good, so I have no issues working with people from different countries.

Skills

- Experience with full-stack
- General tech skills (vegas pro, photoshop, Reaper DAW etc..)
- Well articulated & empathetic
- Content creation skills (social media platforms)

Languages

- Finnish (native)
- English (excellent)
- Japanese (beginner)

Petri Korpikoski

ICT Engineering Student at Lapland University of Applied Sciences (Lapin AMK)

My experience in programming

(2022 -2024)

LEARNING THE FUNDAMENTALS

- Started by learning the fundamentals of Python and programming through a beginner's course offered by freeCodeCamp.
- Started working on the basics of the web stack: HTML and CSS.
- Earned the certificate of completion for Responsive Web Design.
- Moved on to Javascript now that I had my web development basics down.
- Earned the certificate of completion for Javascript Algorithms and Data Structures.

(2024 - Current)

FROM SELF-TAUGHT TO ENGINEERING STUDENT

- Moved on to learning React now that my fundamentals were good enough.
- Started reading up on databases, such as MySQL.
- Currently delving deeper into Python programming and computer hardware.
- Actively studying in **Lapland University of Applied Sciences (Lapin AMK)**.
